Uniform  
V-shaped  
membrane

Uniform  
echotexture  
at low gain

Minimum after-  
movements in early  
retinal detachment

Flickering movement  
over the membrane

LOG  
TF1

A grayscale B-scan ultrasound image of the eye. It shows a dark, irregularly shaped area representing the retina, which appears detached from the underlying tissue. The surrounding tissue is lighter in texture. The image is labeled 'LOG' and 'TF1' in the top left corner.

**B-Scan of Retinal Detachment**
