

ICTs and Rural Development By M.A. Orabi

ICTs and Rural Development: Sohag, Egypt: A Case Analysis

The study tried to cover the main three fields of the rural development of Sohag, Egypt community (i.e Educational, Health and Agricultural sectors) on the bases of use of the ICTs in the development in the era of information technology. This work can not be accomplished without the great efforts provided to the author by the advisory committee at the faculty of Agriculture, Assiut Univ., Egypt. The outcomes of this work should be considered while planning for the development either in the area .of research or any other at least in the Upper Egypt area

This book consisting of a great efforts of primary data and field visits as a part of the MSc. study of the author, the study conducted on 2012 at Sohag, Egypt. To document the role the ICTs plays in the .rural development process
