

Sheet NO. 3

calculate the loads on both the secondary beams and the main girders shown in Fig ... For the given data :

- . slab thickness = 12 cm
- . cover load = 150 kg/m²
- . Live load = 200 kg/m²
- . All beams subjected to walls of thickness 12 cm
- . Height of floor = 3.00 m
- . All beams has cross section (25*60) OR (12*60)
