

Principle of infectious diseases and veterinary epidemiology

- 1- Health
- 2- Disease
- 3- Infectious disease
- 4- Subclinical infection
- 5- Contagious disease
- 6- Zoonotic disease
- 7- Shedding rate
- 8- Sources of infection
- 9- Reservoir
- 10- Carrier and its type
- 11- Mode of infection
- 12- Mode of transmission
- 13- Transovarian transmission
- 14- Transovarial transmission
- 15- Transstadial transmission
- 16- Incubation period
- 17- Sequel of disease
- 18- Enterotoxaemic disease
- 19- Enterotoxigenic disease
- 20- Bacterimia

21- Toxemia

22- Septicemia

23- Viraemia

24- Parasitemia

25- Antigenic toxins & non antigenic toxins

26- Course of disease
