## Cover Letters

Resources for writing the perfect cover letter

[Explore our services](#)

[Quote Order](#)

Competition for publication space and for editors' attention is very high. Today it is no longer sufficient to submit a manuscript to a journal editor with a cover letter saying "please find my manuscript attached." The cover letter is your opportunity to directly "sell" your manuscript to the journal editor. It can set your manuscript apart from others by explaining why your findings are important and why they should be published in your target journal.
