

MCQ (self-assessment)

- 1- Incident parallel light rays come to a focus onto the retina in:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 2- Incident parallel light rays come to a focus in front of the retina in:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 3- Incident parallel light rays come to a focus behind the retina in:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 4- The following refractive errors are spherical errors except:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 5- Accommodation can improve far vision in:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 6- Accommodation can worsen far vision in:
(a) Emmetropia (b) Myopia
(c) Hyperopia (d) Astigmatism
- 7- Accommodation acts:
(a) Alone (b) Unequal
(c) Unilateral (d) None
- 8- Myopia is:
(a) Increase in eye dioptric power (b) Decrease in eye dioptric power
(c) A & b are correct (d) A & b are wrong
- 9- Hyperopia is:
(a) Increase in eye dioptric power (b) Decrease in eye dioptric power
(c) A & b are correct (d) A & b are wrong
- 10- Astigmatism is:
(a) Increase in eye dioptric power (b) Decrease in eye dioptric power
(c) A & b are correct (d) A & b are wrong
- 11- The main treatment of refractive errors is:
(a) Spectacles (b) Contact lenses
(c) Refractive surgery (d) None
- 12- The refractive system includes the following structures:
(a) Cornea and crystalline lens (b) Aqueous humor and vitreous
(c) Precorneal tear film (d) All of above
